

ORIENTAL GIKEN INC. to Exhibit at Asia's Largest Exhibition, Thailand LAB INTERNATIONAL

—Proposing Next-Generation Workspaces to Researchers Worldwide—

ORIENTAL GIKEN INC. (Headquarters: Chiyoda-ku, Tokyo; President and CEO; hereinafter “the Company”), a group company of SIX HUNDRED HOLDINGS INC. and specializing in the construction of research environments, is pleased to announce its decision to exhibit at the 16th Thailand LAB INTERNATIONAL 2026. This comprehensive exhibition for analytical instruments and life sciences, the largest of its kind in the Asia-Pacific region, will be held in Bangkok, Thailand, from Wednesday, September 2, to Friday, September 4, 2026.

ASEAN is rapidly increasing its presence as a new global hub for R&D. Precisely because this market is poised to see the creation of numerous new research facilities, there is room to fundamentally re-examine "what kind of environment research should be conducted in," and we see great potential here.

ORIENTAL GIKEN INC. has pursued the concept of a "sensory-stimulating workspace" while engaging with research sites across Japan. We will now fully deploy our expertise and brand, which spans the entire process from product development to research facility design, construction, and organizational

planning, into the fast-growing ASEAN market. Our group's purpose is "For Discovery Moment". We aim to deliver this purpose not just to researchers in Japan, but to researchers worldwide. This exhibition is the first step.

Exhibit Booth Overview

The workspace we envision is more than just a place to work; it is a comprehensive environment that stimulates researchers' sensibilities and fosters co-creation. At our booth, we will showcase the group's projects, which covers the entire process from architectural design to organizational planning, and offer comprehensive proposals for "lab planning" that drives client growth. We will feature our latest laboratory workbenches and the innovative furniture series, "CO-OG." Visitors will be able to experience firsthand this next-generation workspace where hardware and spatial design are seamlessly integrated.

【Featured Products】

Laboratory Furniture

■ Laboratory Benches (Lab Benches)

These lab benches overturn conventional wisdom by achieving both high functionality and stylish design.

- DAHLIA

An all-steel laboratory bench designed to create comfortable sightlines and an atmosphere of seamless communication..

- SAKURA

A wooden laboratory bench that introduces the warmth of wood and ergonomically-based comfort to research spaces that tend to be monotonous.

■ Fume Hoods (Fume Cupboards)

These products comply with international safety standards (ASHRAE-110, EN 14175-3), ensuring the safety of researchers while offering superior operability and comfort.

- LOTUS Fume Hood

Features an expansive glass sash and a high-quality silver/wood grain design, bringing sophisticated brightness and dramatically improved accessibility to otherwise sterile laboratories.

- Piano Push-Pull Exhaust Hood

A new style of fume hood that eliminates the front sash to alleviate uncomfortable working postures, creating a pleasant sense of immersion, while its proprietary airflow control achieves both high safety and energy efficiency.

■ Biosafety Cabinets (BSCs)

Combining essential safety performance with an approachable curved form and luxurious color options, these units create comfortable environments in research laboratories and medical settings.

- Tangerine

A biosafety cabinet featuring an eye-catching elegant curved design, spacious workspace, and world-class safety standards.

- Olive

A compact benchtop biosafety cabinet that, despite its size, provides ample workspace and advanced safety performance.

Innovation Furniture

■ CO-OG (Kogu: Tool for Thinking)

Not mere furniture—it is a tool for thought. In modern offices and research environments, the quality of the workspace is proven to directly influence productivity and creativity. Incorporating this perspective, we propose "Kogu (CO-OG)," tools designed not merely as office furniture, but to stimulate thought, generate dialogue, and nurture co-creation.

- IRORI

A movable, connectable hearth-style module, inspired by the historical practice of people gathering around a fire to talk.

About Thailand LAB International

Since its debut in 2011, "Thailand LAB INTERNATIONAL," now in its 16th edition, is the Asia-Pacific region's leading international trade show for analytical instruments, laboratory technology, and life sciences.

Dates: Wednesday, September 2 – Friday, September 4, 2026

Venue: BITEC (Bangkok International Trade & Exhibition Centre) Hall 102 – 104
