ORIENTAL

Quality Laboratory Solutions from TOKYO

ORIENTAL is a Japanese laboratory engineering company with over 40 years of experience.

Originating as a manufacturer of laboratory furniture and equipment, we have broadened our horizons to include laboratory architectural design, renovation, and EHS (Environment, Health and Safety) services.

Today, we are venturing beyond Japan and delivering our solutions to laboratories worldwide.

We are pleased to announce that we exhibit biosafety cabinets, lab furniture and fume hoods at Thailand Lab International.

Please visit and experience our products.

LAB FURNITURE

Our lab furniture provides superior functionality and stylish colors, shapes and textures that you have never seen in conventional laboratories.

DAHLIA

All-steel laboratory furniture combining a sophisticated, minimalist appearance with outstanding durability.

SAKURA

Wooden laboratory furniture that brings warmth and flexibility to research spaces.

EXHAUST SYSTEM

Our fume hoods ensure the safety, operability, and comfort of researchers with the quality that meets international standards, ASHRAE-110 and EN 14175-3. We also introduce a new style of exhaust hood with improved safety, energy efficiency and comfort.

Piano

A new style of exhaust hood featuring a sash-free design that delivers safety, energy efficiency, and user comfort.

LOTUS

A fume hood with dramatically improved workspace and accessibility through a slimmer side structure and optimized airfoil design.

BIOSAFETY CABINET

Featuring a friendly curved form and luxurious coloring, designed to provide comfort in laboratories, dispensaries, hospitals, and testing facilities. Compact bench-top models are also available.

Olive

A biosafety cabinet combining compactness, ample workspace, smart design, and reliable safety performance.

Tangerine

A biosafety cabinet featuring an elegant curved design, spacious workspace, and reliable safety performance.
